1. The lecture has endowed me with novel and important skills and insights.

[Grafikdaten anzeigen](#)

Mittelwert: 1,48

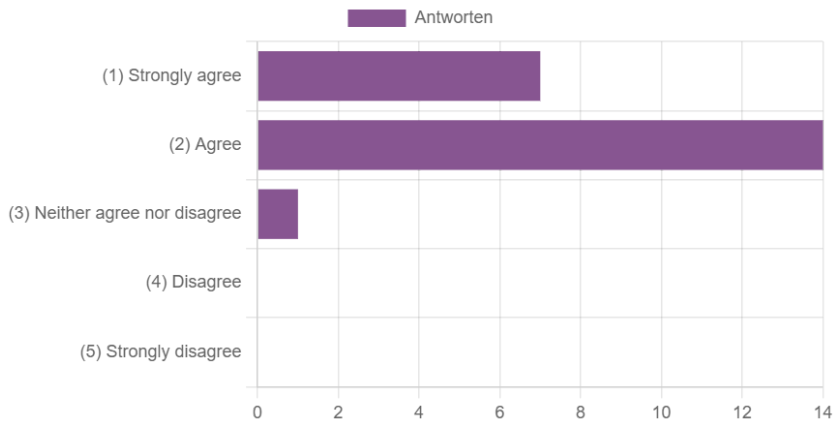

2. The lecture has helped me to better understand economic phenomena and developments.

[Grafikdaten anzeigen](#)

Mittelwert: 1,43

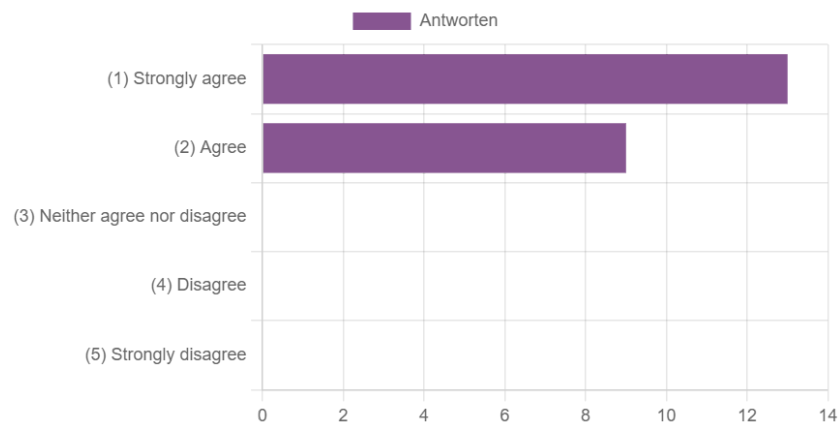

3. The lecture has encouraged and enabled me to think about economic phenomena and developments more deeply.

[Grafikdaten anzeigen](#)

Mittelwert: 1,65

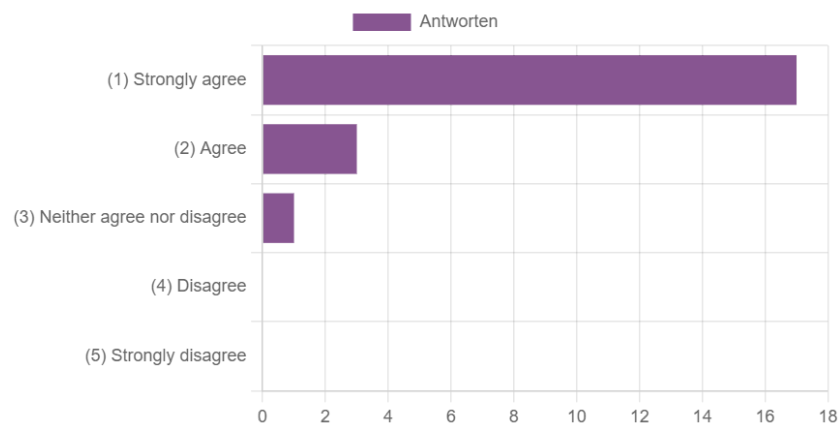

4. During the lecture, the teacher encourages interaction.

[Grafikdaten anzeigen](#)

Mittelwert: 1,35

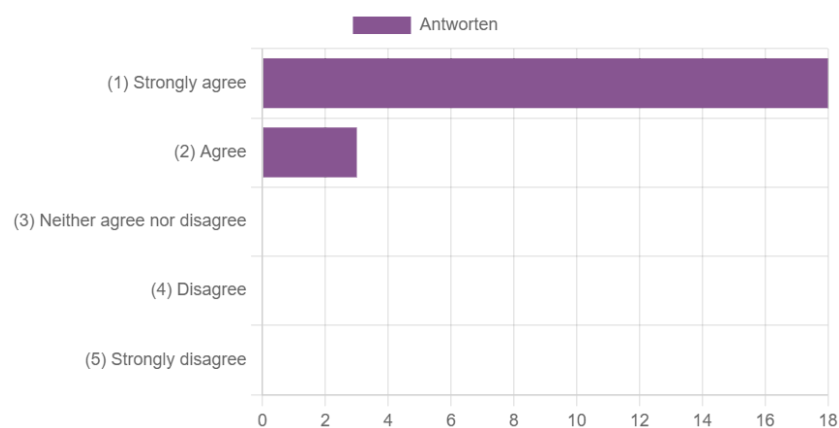

5. The teacher reacts to questions and suggestions.

[Grafikdaten anzeigen](#)

Mittelwert: 1,13

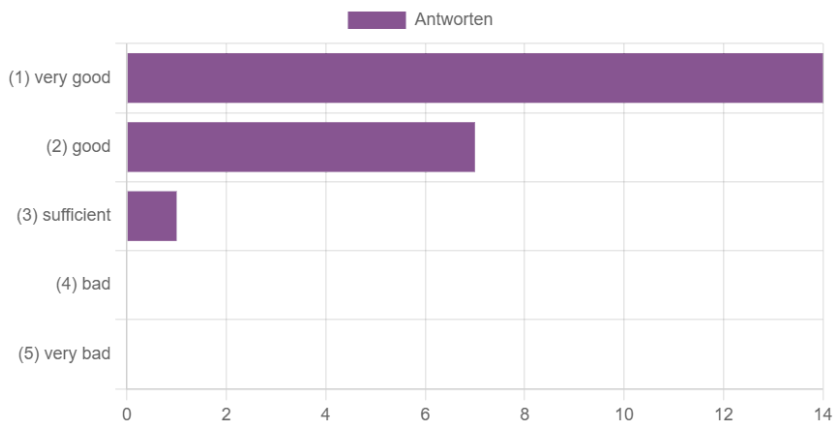

6. The teacher is competent and well-prepared.

[Grafikdaten anzeigen](#)

Mittelwert: 1,04

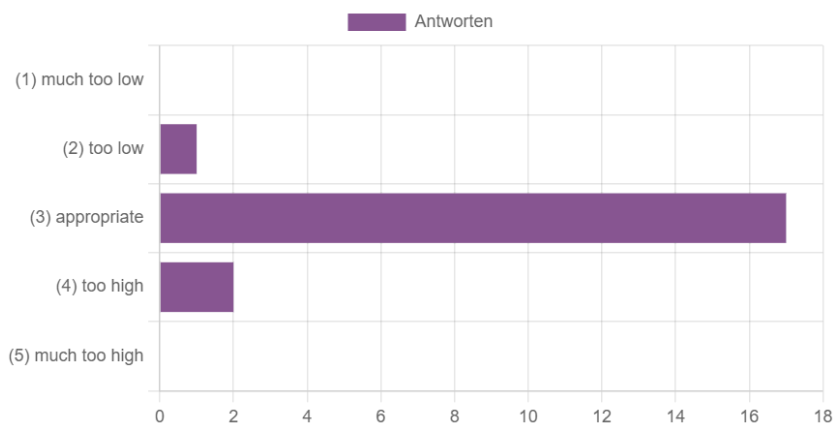

7. The quality of provided teaching aids (slides, videos, etc.) is...

[Grafikdaten anzeigen](#)

Mittelwert: 1,35

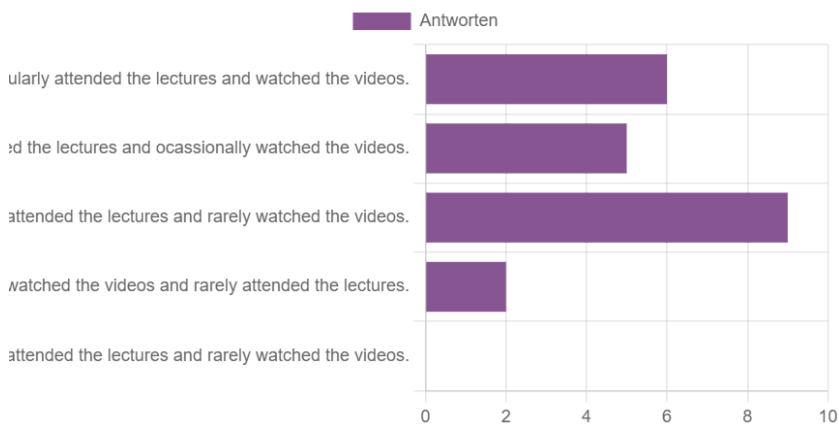

8. The lecture requirements with respect to contents and methods were...

[Grafikdaten anzeigen](#)

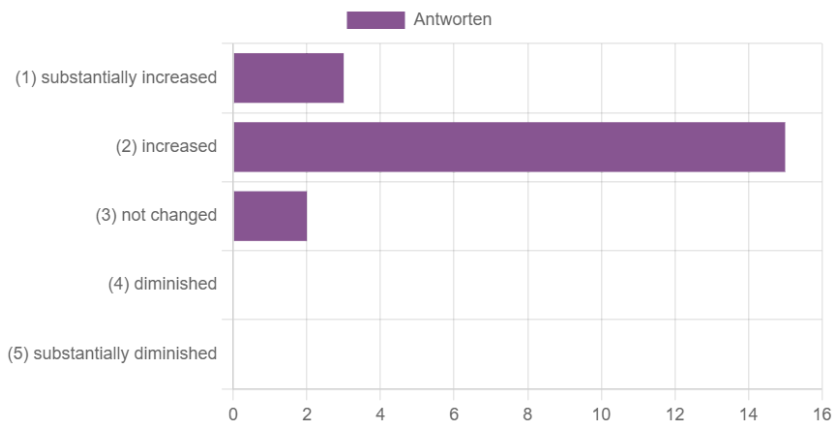

Mittelwert: 2,65

9. How did you follow the lecture?

[Grafikdaten anzeigen](#)

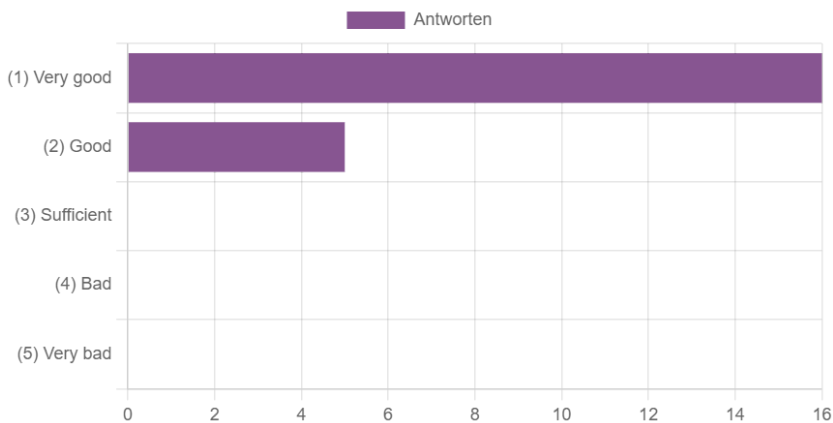

10. Due to the lecture, my interest in economics has...

[Grafikdaten anzeigen](#)

Mittelwert: 1,70

11. Taking all aspects into account, how do you rate the lecture?

[Grafikdaten anzeigen](#)

Mittelwert: 1,13

12. What did you especially like about the lecture?

- The interest and passion that professor has in this course
- I like that the contents are not too long but contain most of the important points. I also like that the professor takes notes and try to use simple examples to explain the concept in the lecture. The passion and style that the professor uses in the lecture are also very good.
- The way Prof Harms lectures is very refreshing and avoids the lecture from becoming boring.
- It's a great lecture for student like me who don't have much economics backgrounds in before. It's helpful and teaching the economics theory from basics.
- I like mostly the way of lecture delivery. My concentration always focuses on Professors.
- It's always well-prepared and Prof. Harms is highly motivated which encourages to stay with him in the lectures. For people who haven't done their bachelor at JGU, it is easy to catch up because of the first two or three introductory lectures.
- your teaching methods and ways of explaining things is very clear and easy to follow, especially when it comes to relating things to everyday life
- I especially appreciate the two-week intro to international trade and the covering of the fundamentals. It was a very good foundation to appreciate the rest of the lecture. The professor is also very engaging, and gives relevant examples to aid in understanding the material.
- The small excourses about the history as economics as a science and other economic history stuff is very nice.
- It was given in an interesting way.
- Prof. Harms has a very motivating teaching method which I highly value. It is fun to be in the lectures.
Also, the videos offered on moodle are very helpful!
- Professor Harms's lecture is one of the best things that one can expect and experience in the MIEPP program at JGU. He explains very complicated topic to a basic level that anybody can understand easily. Some of the stuff I've learned in my bachelor degree were without any logical explanation and now thanks to Professor Harms, I know why they are important and where they can be applied.
- I really liked the teaching, very well prepared and easy to listen to.
- The approachability of the Professor and assistants. Moreover, painful as it is, the theoretical ground-preparing work that it is being done for future applied courses is most useful.
- The way of presenting and bringing the topics across

13. What should be improved?

- More empirical examples to connect with the theories.
 - The class interaction between students and students and with the professor could be improved.
 - -
 - Maybe some timeline about economic eras with there most important scientist/models to get a better grasp about the evolution in economics.
 - There is a genuine concern on persuading the students of how mathematically sound the equations are. Personally, I´d be more than content with taking their word for it.
 - Topical themes should be included some more.
 - Nothing
 - Maybe it would be nice to upload everything we do during the lecture/ tutorials as soon as possible:)
 - during the lecture mentioning of which derivations will be talked about in the tutorials would be helpful
 - Nothing so far in the lecture.
- However, in the lecture hall: may be switching off the lights in the very first row could be helpful to see the slides better. Sometimes the slides are horribly presented due to the lighting distribution.
- I would appreciate a more frequent cadence of uploading the professor's notes to be accessible. I am unfortunately not able to copy fast enough and listen at the same time, so waiting till the end of a chapter to get notes impedes the rate at which I can also revise. In the course syllabus, there are some interesting papers that are suggested reading. I never actually asked this: I think it would be wonderful if they were scaled in order of how much of the course needs to be covered before you can understand the paper.
 - Slide should less as my view of point. Everything is fine. I love to watch video several times after attending the class lecture.
 - Some slides are too messy after taking notes, maybe leave some blank slides where it is easier to write on without getting to messy.
- Also it is a lot of material to cover.
