12. What did you especially like about the lecture?

- Oasis is a great band
- The prof and the practical examples
- the atmosphere, speed and explanations, illustrative examples, step-by-step calculations
- Charisma of Professor and talent to teaching, his knowledge and fluency in taught matter, clear presentations
- The way that the professor tries to bring the topic closer to the students with his interactive teaching style
- Very interesting topic and lecturer knows very much about it and can usually present it very well
- The understandable way of explaining things through simple examples
- The Prof

13. What should be improved?

- Very large amount of content with many relationships and formulae to remember, pace sometimes too fast. Notes on slides occasionally hard to understand if not followed closely
- Parts of lectures, when long equations were written and explained. They sometimes got chaotic and too long and I didn't manage to follow them accordingly, as some of my peers
-
- In my opinion Problem Sets could be uploaded earlier, so that there's enough time to do them
